5MP Pan-Tilt-Zoom Camera with 42x Optical Zoom

Matrix has introduced Pan Tilt Zoom (PTZ) Cameras that are designed for all round surveillance. A PTZ Camera works by moving the camera in different directions (Pan and Tilt) to get the whole picture of the surveillance area and zooming in for further details of the security events. The Pan, Tilt, and Zoom mechanism of PTZ cameras allow it to monitor large areas with greater details. Furthermore, the camera is powered by True WDR algorithm, which ensures evenly balanced images even in varying lighting conditions. The camera is loaded with smart monitoring features like moving to a particular preset position and easy integration through ONVIF making it an ideal product for maximum protection at minimal cost.
