

SPARSH VP210E Business IP Phone for Modern Organizations

SPARSH **VP210**

The modern growing businesses often face bigger challenges than those faced by the established entities. Wherein, Speech plays a pivotal role in shaping the business communication.

With that idea, we present this modern IP Phone. Designed to maximize the reachability and accessibility of an organization, this device boosts productivity.

Overview

In the modern business world, the present and the future of telecommunication is IP telephony. Bearing that idea, the major challenge to adopt IP telephony is the cost of an entry-level desk phone. With 70% employee strength still using entry-level desk phones, IP telephony sounds like a distant dream.

Hence, we have introduced an entry-level Gigabit IP Phone, SPARSH VP210, in the family of SIP phones. This phone aims to redefine the desktop telephony experience and quality of business communications.

The challenge to adopt IP telephony is the cost of an entry-level desk phone. This is where SPARSH VP210 finds its way, offering a range of applications in places like call centres, enterprises, small businesses, branch offices and government sectors.

Product Specifications
